

Structured Cabling

Systems for Intelligent Buildings and Smart Infrastructures

Structured Cabling Systems for Intelligent Buildings and Smart Infrastructures

BPG designs, builds, and maintains structured cabling systems that support your business's framework or backbone. It is one of the most critical components of your building as it connects essential systems for your workforce, vendors, and partners. Our goal is to provide our customers versatility and flexibility in your building infrastructure vital to your success.

OUR SERVICES

The need to operate your building IT cabling infrastructure at webspeeds is critical to your success. By deploying a scalable fiber optic and copper cabling system ensures these needs are met. Using BICSI Registered Communication Distribution Designers (RCDD), BPG will assist you in designing and implementing a robust structured cabling system to complete your project needs and within your budget.

- Estimating and Budgeting
- Design Assist and Design-Build
- AutoCAD, BIM, and As-Built Services
- DAS (Distributed Antenna Systems) Design-Build Services
- Wi-Fi Solutions
- ISP Raceway and Cable Tray design and build services
- Rack and Stack, Equipment Installs and Patching
- Intra-building and campus fiber optic system Design-Build

OVERCOMING CHALLENGES

One of the challenges in designing and installing a structured cabling system is how to future proof the infrastructure to meet the ever-changing technology advancements demanding more bandwidth to the end device.

As a [structured cabling solutions provider](#), BPG can plan and execute your structured cabling system that will optimize and leverage the latest technology no matter what technology comes next in data transformation, building automation and IoT.

When you choose BPG as a partner for your project, be assured the quality of work, attention-to-detail, and overall operation maintenance from start to finish will be exceptional. The design integration, installation, and everything that comes after is unparalleled in our industry. Every service we provide is delivered with the intent to better the community we serve and make a difference in the lives of the people we work with on a daily basis.
